International Conference on Data-Processing and Networking (ICDPN-2026)

Date: 25th -26th September, 2026

ORGANISED BY : Institute of Technology and Business in České Budějovice, Near Prague, Czech Republic, Europe (Venue).

********** CALL FOR PAPERS **********

SPECIAL SESSION ON
Artificial Intelligence and Machine Learning in Cybersecurity

SESSION ORGANIZERS:

Dr Mohammad Tabrez Quasim
Associate Professor
Department of Computer Science and Artificial Intelligence,
College of Computing and Information Technology, University of Bisha, Bisha, Saudi Arabia
tabrezquasim@gmail.com

SESSION DESCRIPTION:

With the rapid growth of digital technologies, cybersecurity has become more challenging than ever. Traditional security systems often struggle to keep up with modern cyber threats, which are becoming increasingly sophisticated and unpredictable. Attacks such as ransomware, phishing, and advanced persistent threats require smarter and more adaptive defense mechanisms.

In recent years, Artificial Intelligence (AI) and Machine Learning (ML) have shown strong potential in transforming how we approach cybersecurity. These technologies can help in identifying hidden patterns, predicting possible attacks, and responding to threats in real time. However, their adoption also raises important questions related to reliability, privacy, and security risks.

This special session aims to provide a platform for researchers and professionals to share their ideas, research findings, and practical experiences in this evolving area. The goal is to encourage meaningful discussions on how AI and ML can be effectively and responsibly used to strengthen cybersecurity systems.

RECOMMENDED TOPICS:

Topics to be discussed in this special session include (but are not limited to) the following:

- Machine learning for cyber attack detection and prevention
- Deep learning for malware and threat identification
- AI-based cyber threat prediction and analysis
- Adversarial machine learning in security

Edit with WPS Office

- NLP for phishing and spam detection
- AI in cloud, network, and IoT security
- Explainable AI for transparent decision-making
- Privacy-preserving and federated learning
- Automated incident response using AI
- Blockchain integration with AI for security
- User behavior analytics and anomaly detection
- Ethical and legal aspects of AI in cybersecurity

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this special theme session on **Artificial Intelligence and Machine Learning in Cybersecurity** ***on or before*** **3oth JULY 2026**. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at **https://www.icdpn-conf.com/Downloads**. All submitted papers will be reviewed on a double-blind, peer review basis.

NOTE: While submitting paper in this special session, please specify **[Artificial Intelligence and Machine Learning in Cybersecurity]** at the top (above paper title) of the first page of your paper.
