International Conference on Data-Processing and Networking (ICDPN-2026)

Date: 25th -26th September, 2026

ORGANISED BY : Institute of Technology and Business in České Budějovice, Near Prague, Czech Republic, Europe (Venue).

********** CALL FOR PAPERS **********

SPECIAL SESSION ON

Language, Intelligence, and Agency: Interpretable and Generative AI Paradigms

SESSION ORGANIZERS:

Dr. Nitin Jain, Bennett University, Greater Noida, Uttar Pradesh, India
Dr. Dipika Jain, Bennett University, Greater Noida, Uttar Pradesh, India
Dr. Pallavi Ranjan, University of Murdoch, Dubai, UAE
Dr. Aman Anand, ITS Engineering College, Greater Noida, Uttar Pradesh, India

EDITORIAL BOARD: (Optional)

[Name, University or Organization, Country, e-mail]

SESSION DESCRIPTION:

In the current paradigm of decision making based on data, linguistic information has become one of the most complex and high-level forms of data. is dedicated to converged Linguistics, Artificial Intelligence, Explainable AI (XAI), Agentic AI, and generative AI that fall in a wider framework of data analysis and wise stewardship of information. The current AI applications, especially large language models and autonomous agents, operate on large amounts of structured and unstructured linguistic information, which makes the evaluation of interpretability, reasoning, governance, and ethical stewardship the primary considerations of their use. The synthesis of linguistic theory and state-of-the-art architecture AI systems illustrates the potential futility of interpretable and agentic AI systems to enhance transparency, accountability, and trust in the data-centric application during the session. Also, this session will explore how Generative AI leads to the transformation of data management pipelines by developing automated capabilities to create knowledge, summarize it, reason, and provide decisions. The special session aims at creating interdisciplinary dialogue amongst scholars and practitioners working around intelligent data analysis, language-centric modelling and foundations of responsible AI governance.

RECOMMENDED TOPICS:

Topics to be discussed in this special session include (but are not limited to) the following:

- Linguistic data modelling and representation for large-scale data analysis
- Integration of linguistic theories with data-driven and deep learning approaches
- Explainability, interpretability, and accountability in language-based AI systems
- Autonomous and agent-based AI systems for intelligent data management

- Generative AI techniques for data synthesis, augmentation, and decision support
- Ethical, transparent, and governance-aware AI for language and knowledge data

The session welcomes original research papers, applied studies, case studies, surveys, and position papers that demonstrate innovative approaches to managing, analysing, and interpreting linguistic and multimodal data using advanced AI techniques.

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this special theme session on **[SESSION NAME]** ***on or before*** **[30th JULY 2026]**. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at **https://www.icdpn-conf.com/Downloads**. All submitted papers will be reviewed on a double-blind, peer review basis.

NOTE: While submitting paper in this special session, please specify [**SESSION NAME**] at the top (above paper title) of the first page of your paper.
