

International Conference on Data-Processing and Networking (ICDPN-2026)

Date: 25th -26th September, 2026

ORGANISED BY : Institute of Technology and Business in České Budějovice,
Near Prague, Czech Republic, Europe (Venue).

******* CALL FOR PAPERS *******

SPECIAL SESSION ON

AI-Driven Cyber Resilience in Distributed Fog-Edge Systems

SESSION ORGANIZERS:

Dr. V. G. Prasuna, Satya Institute of Technology and Management (SITAM), India;

PDF Scholar, School of CS & AI, SR University, Warangal, Telangana, India.

Email: prasunavg@gmail.com

EDITORIAL BOARD: (Optional)

(To be added later, if required)

SESSION DESCRIPTION:

The rapid evolution of distributed intelligent infrastructures, fog-edge ecosystems, AI-native cyber-physical systems, and autonomous digital services has significantly increased the importance of resilient and trust-aware cybersecurity architectures. As AI becomes deeply embedded in critical infrastructure and data-processing environments, ensuring reliability, controllability, explainability, and secure recovery mechanisms has emerged as a major interdisciplinary research challenge.

This special session aims to bring together researchers, academicians, industry professionals, and practitioners working on resilient AI systems, distributed intelligent infrastructures, adaptive cybersecurity, and trust-aware architectures for next-generation computing and networking ecosystems.

The session particularly encourages contributions that address practical and scalable approaches for securing distributed AI-driven environments, including fog-edge infrastructures, cyber-physical systems, intelligent networks, and autonomous digital ecosystems, with emphasis on data-processing, real-time networking, and system-level resilience.

RECOMMENDED TOPICS:

Topics to be discussed in this special session include (but are not limited to) the following:

- AI-driven cyber resilience
- Trust-aware distributed systems
- Fog-edge cybersecurity architectures
- Autonomous recovery and self-healing systems
- Human-in-the-loop resilient AI
- Adaptive intelligent infrastructure security

- Federated AI security frameworks
- Explainable cybersecurity systems
- AI-native infrastructure protection
- Resilient cyber-physical systems
- Distributed intelligent ecosystem governance
- Secure AI orchestration in edge environments
- Threat detection in distributed intelligent systems
- Reliable and adaptive infrastructure intelligence
- Privacy-preserving and federated learning in edge/fog environments
- Real-time security analytics for IoT and CPS networks
- Secure data-processing and networking in fog-edge ecosystems

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this special theme session on “AI-Driven Cyber Resilience in Distributed Fog-Edge Systems” on or before 30th July 2026. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE’S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at icdpn-conf.com. All submitted papers will be reviewed on a double-blind, peer review basis.

NOTE: While submitting paper in this special session, please specify “AI-Driven Cyber Resilience in Distributed Fog-Edge Systems” at the top (above paper title) of the first page of your paper.
